

Toronto Insurance Council & Insurance Brokers Association of Canada

Coverages with Limited Availability from Insurers Licenced in Canada

December, 2024

Interpretation:

Finite: Substantial capacity may be available (\$1,000,000,000 and up), but still insufficient for entities requiring very high limits

Limited: Some licenced capacity is available (\$50,000,000 or more) **but frequently insufficient for purchaser requirements**

Scarce: Very little licenced capacity is available (Less than \$50,000,000) and underwriters may be extremely selective in deploying.

Any	Stand-Alone Terrorism and/or Political Violence	Limited	
Any	Kidnap & Ransom	Finite	
Any	Contract Frustration	Limited	
Any	Political Risk	Limited	

Notes on Nuclear risks: Nuclear exposures are a standard exclusion on all conventional property policies. Only one insurer (NIAC) is licensed by the Federal Government to write this coverage and their terms are restrictive and their limits are aggregated. Also, worldwide coverage is required to place the coverage required by today's shareholders and lenders. Legislation passed in 2015 increased operator liability responsibilities up to \$1,000,000,000. NIAC has confirmed that they do have government-approved capacity up to \$1,000,000,000 limits however their primary audience is nuclear facility operators, and terms may not satisfy the requirements of all clients needing coverage.
